

EP5

Eidolon Full-Color Precision Cut EP5 Monochrome Edition is an innovative waterproof cutting light, available in three professional color temperatures: 3200K, 4000K, and 5700K. The light output is pure and stable, with excellent color rendering performance. Equipped with a high-quality optical system, it delivers uniform and soft light spots with clear, sharp imaging. The focusing system supports continuous adjustment from 20° to 40° with precise angle positioning. Its flexible integrated cutting system shapes and cuts light beams to achieve precise light and shadow sculpting on illuminated objects. The luminaire supports smooth and delicate dimming control to meet the stringent lighting demands of landscape illumination. A built-in rotating gobo wheel can project custom patterns and textures to enhance visual depth. With an IP66 high protection rating, the whole fixture ensures stable and reliable operation. It is ideal for professional scenarios requiring high-precision lighting and light-shadow styling, such as cultural relic architecture, ancient building tile surfaces, plaque signage, sculptures, live-action performances, cultural tourism night tours, theme parks, and more.

LED LIGHT SOURCE

3200K、4000K、5700K

GENERAL TECHNICAL PARAMETERS

TECHNICAL PARAMETERS

Rated Power
300W

Light Source
300W 3200K、4000K、5700K

Angle
20°-40°

Functional Effects
Display panel control (static mode); 0-25Hz stroboscopic

Cutting System
Equipped with 4 built-in cutting blades, capable of cutting graphics of various sizes and shapes freely

Channel Modes
SIMPLE(4CHS), MODE 16BIT(5CHS)

Focusing
Linear focusing function

Product Dimensions (L×W×H)
810x344x273mm
